Summary

Full-Stack Developer with hands-on experience building and maintaining scalable web applications using modern technologies. Motivated, fast learner, and eager to contribute to a professional engineering team.

Experience

Full-Stack Developer – Log-On Software (2026–Present)

- Developing and maintaining full-stack applications using Angular and C#
- Designing and integrating REST APIs between frontend and backend systems
- Working with cloud services (AWS, Azure) for deployment and scalability
- Collaborating using Git and modern development workflows

IT Support Specialist – Prime Minister Office via Log-On Software (2025-2026)

- Provide technical support for Windows environments, troubleshooting hardware, software, and network issues.
- Manage user accounts and permissions in Active Directory and Microsoft 365.

Projects

- **JobTrack** – Full-stack mobile app (React Native, Node.js, PostgreSQL, Docker). Integrated **Groq AI** for automated URL parsing and intelligent job application tracking. [JobTrack](#)
- **Real-Time Delivery Tracking System** – End-to-end web application using Node.js, Express, MongoDB, and AJAX with Leaflet maps to track package delivery routes. [DeliveryApp](#)
- **Containerized Python App on AWS EC2** – Deployed a Python app in Docker on AWS EC2 for scalable cloud execution. [Python-docker](#)
- **Node.js Blog Web App** Full-stack RESTful blog platform implementing CRUD operations with Express.js, EJS templating, and API-driven architecture. [Web-blog](#)
- **Multithreaded HTTP Server (C)** – Built a custom HTTP/1.1 server with thread pool and task queue for concurrent request handling and static file serving. [Multithread server](#)

Skills & Technologies

Backend & Frontend Development: Python, Node.js, Express.js, C#, RESTful APIs, Angular, React.js
Databases: PostgreSQL, MongoDB, Firebase
Web Technologies: HTML, CSS, JavaScript, EJS
Machine Learning & Data Science: Supervised Learning, NumPy, Model Evaluation
Cloud & Tools: AWS, Azure, Docker, Git, GitHub, GitHub Actions, Linux (Bash)
Programming Languages: Python, Java, C++, C, C#, JavaScript, SQL
Concepts: Object-Oriented Programming, Socket Programming, Multithreading, API Design

Education

B.Sc. Computer Science – Azrieli College of Engineering (2022-2025)

- GPA – 97
- Awarded for outstanding academic excellence during degree studies.
- Mentored first-year students in coursework, academic planning, and effective time management.

Army & Volunteering

Combat Intelligence Collection Corp Officer (Lieutenant) – IDF

Led a 15-soldier team, managing missions, war room operations, and base security under pressure.

National Service – Youth Project Leader, BINA

Volunteered mentoring at-risk youth, leading educational and social initiatives to promote leadership.

Languages

Hebrew – Native

English – Professional Fluency
